# Electric Applicators for dot, line and spray gluing

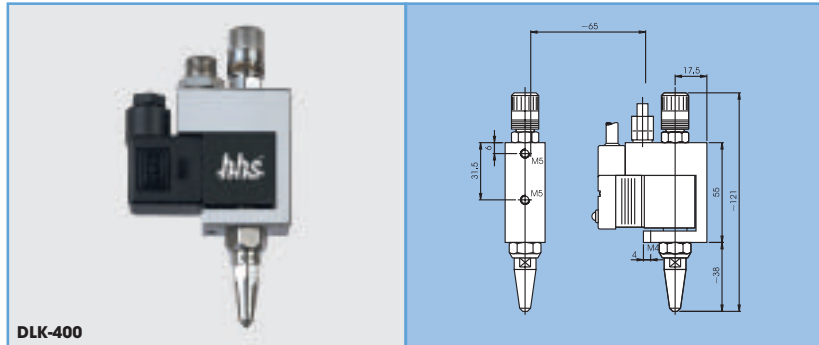

Electric glue application guns with a high switching rate for medium and high viscosity adhesives.

Areas of application:

- Fitted with high power solenoid 6V for high-speed collators, gluing machines for collapsible boxes and envelopes; max. glue viscosity: 2.500mPa.s (Brookfield)
- Fitted with standard solenoid 24V for slower machines which are equipped with a PLC; max. glue viscosity: 1.000mPa.s (Brookfield)

## Electric Gluing Guns Series DLK-400

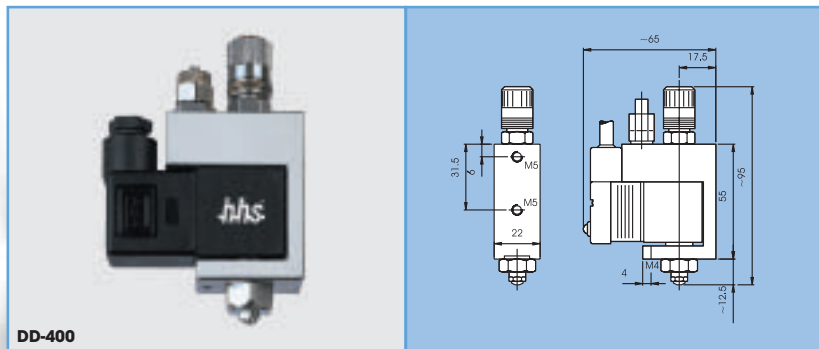

for contact and non-contact application of medium and high viscosity adhesives; with wear-free sealing system for high cycle rates and unparalleled accuracy.

DLK-400

## Electric Dot Gluing Guns Series DD-400

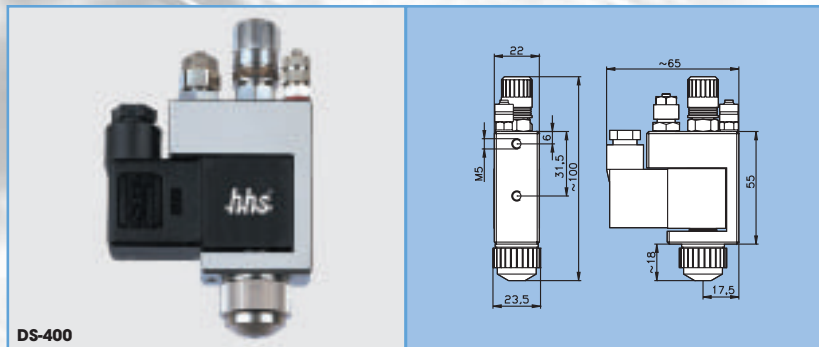

for non-contact dot application of medium and high viscosity adhesives; with wear-free sealing system for high cycle rates and unparalleled accuracy.

DD-400

## Electric Spray Guns Series DS-400

for continuous and intermittent spray application. The spray air control functions via an external refining pressure regulator, pre- and post-air blasts are controlled by a separate solenoid.

DS-400

All specifications subjected to change without prior notice.

### Technical data

Series	Gun type	Application	Glue connection	Max. pressure	Max. Frequency*
DLK400-6V	Line gluing gun	contact/non-contact	6/4 oder 1/4*	25bar	500/sec
DLK400-24V	Line gluing gun	contact/non-contact	6/4	10bar	200/sec
DD400-6V	Dot gluing gun	non-contact	6/4	10bar	500/sec
DS400-6V	Spray gun	non-contact	6/4	10bar	500/sec
DS400-224V	Spray gun	non-contact	6/4	10bar	200/sec

\*The switching rates depend on the glue viscosity.
